

# baumannLIVING

One-stop inspiration for the home

welcome to  
**the  
kitchen  
family**

## baumann**LIVING**: we're going all the way!

Giving a home new furnishings is incredibly exciting. Not only because it needs to be perfect. Buying furniture is also full of new possibilities and anticipation. Planning a kitchen, for instance, means much more than just putting together cabinets and appliances. It's that feeling of gladness to get back home again. It whets the appetite to cook great food. It promises relaxation and joyful moments with family and friends.

New furnishings are not only made for the here and now, they are always a piece of tomorrow too. Furniture provides the framework in which to feel at home. It is part of us, leaving us to gather precious memories, watch our children play, laugh and grow up. This makes good quality so important. And also calls for sturdy furniture that has no impact on health and is made with respect for the environment. Preferably by someone who instinctively knows how to create homes with that all-important feel-good factor.

This is where we come in. And we've got some fantastic news: from now on, the baumann group is going all the way, competently providing furniture for the entire home! Because the kitchen family's line-up has so much more to offer than beautiful kitchens, we have launched baumann**LIVING**. Using the collections from BAUFORMAT, burger Küchen and badea, design aficionados and young families setting up home can plan every furnishing aspect while combining whatever they like best.

On over 60 pages, this brochure shows you what life at home can look like with baumann**LIVING**. Describing them in detail, BAUFORMAT and burger create two compositions for each of five theme-based sections – Entry, Living, Dining, Sideboard and Office. Following the detailed "list of ingredients" anyone wishing to can easily emulate our ideas and suggestions to get a feel of what's possible.

A separate section is also dedicated to bathrooms. Enjoying tremendous success on the international stage, the badea range makes more of every bathroom and goes perfectly with all of the home's other furnishings. The overview is complemented by a choice of homely accessories. For instance, they can be used as connecting elements – for a warm, inviting home through and through.

baumann**LIVING**. We are now going all the way and invite you to **join us!**
